Florence around 1500: Leonardo da Vinci is horrified! A burglar has sneaked into his workshop and stolen a book with valuable notes. Leonardo's student Salai and his girlfriend Caterina set off in the alleys of Florence in search of the culprit. Soon they pick up the trail of a mysterious stranger - and set a trap for him ...

The series ""Science Mysteries"" offers readers of 10 and up an exciting look at the world of inventions, technology and science. Each volume revolves around an important figure in the history of science, against whom a crime has been committed. The case is cleared up by young detectives - with the help of the reader, since, as usual in the Mysteries series, there are tricky puzzles to be solved at the end of every chapter. And along the way they learn a lot about the life, inventions and discoveries of the scientist concerned. As well as a time line, the appendix has even more information and little experiments for readers to try out themselves. And science is made real for them in the process!
