Story

Würzburg in April 1896: Professor Röntgen gives a lecture about his discovery of the X-Rays, when suddenly one of his students gets arrested. The suspicion: Abduction! But the state of evidence is uncertain and the kidnapped girl cannot be found. Michel, Schorsch and Klara try to solve the case and a hint leads them directly into the professors' laboratory. Could the professor be the kidnapper? No! The students find the real abductor and prove the professor's innocence.

Renée Holler

Renée Holler was born in Würzburg in 1956. She studied ethnology, then worked in a publishing house and after that travelled extensively. Since 1992 she lives in Oxford where she spends her time writing and translating.
