Story

- **Short** chapters and texts with many **pictures**, **summaries** and funny **illustrations**
- Behavioural **Biology for Kids** – *easy to understand!*
- Popular non fiction with a narrative aspiration
- With **experiments** and **exercises** to try on your own!

- By **best-selling** author and behaviourist Karsten Brensing

Did you know that ants can identify themselves in mirrors and dolphins have names? That rats like to laugh together and orcas are true mummy's boys that still live with their parents at the age of 30?

Biologist Karsten Brensing tells amazing stories from the animal kingdom. Starting from bees to meerkats to monkeys and elephants, he explains that animals think and feel very similar to humans. Kids even get to know their pets like cats, dogs and hamsters in an entirely different and new way.
